

Simply Beautiful Dentistry One Smile at a Time

Continuity of Care — All Your Dental Needs In One Location

"Since 1991, Dr. Grossman and his team have taken my entire health profile into consideration. They listen and address my concerns always. I will continue to drive the 60 miles each way to see them because I'll never find a more caring, talented professional dental team!"

Changing Lives

04

Changing many lives, one smile at a time.

As an accomplished dentist with an exclusive private practice in Brentwood, Dr. Jay Grossman focuses on delivering ultra high level care with state-of-the-art equipment and techniques.

There is very little Dr. Grossman and his associates cannot do to amp up the wattage of your smile. Why not give your smile the power to light up a room?

CONCIERGE DENTISTRY

Cosmetic Dentistry

Our goal is to give you all the benefits of a great smile. We want to enhance your appearance, your confidence, and your self-esteem. We want to give you the best that today's cosmetic dentistry has to offer, included:

- Dental Implants
- Lumineers® Veneers
- Teeth Whitening and Cosmetic Bonding
- Porcelain Crowns, Bridges, and Dentures
 - Color-Matched Composite Fillings

Invisalign®

Instead of metal braces, Invisalign® uses a series of invisible, removable and comfortable aligners.

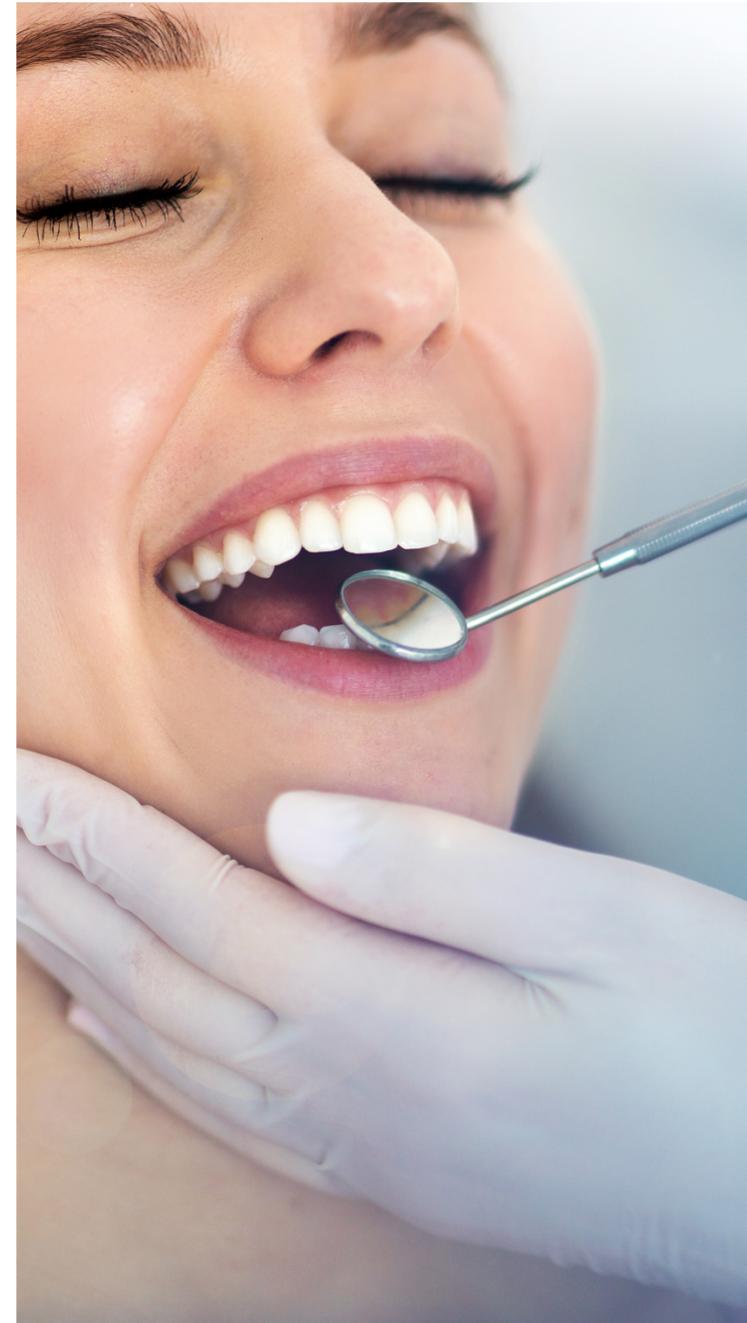

Made using state-of-the-art 3D computer Imaging technology, Invisalign® has been proven just as effective as traditional metal braces for straightening teeth.

Dr. Grossman is an Invisalign® Elite Preferred Provider, which means he is among the top 1% of all Invisalign® providers throughout North America, having delivered more than 20,000 aligners to patients.

Endodontics

Root canal therapy or treatment is a simple nonsurgical procedure that can save natural teeth and prevent the need for an artificial tooth replacement, such as an implant.

When you need a root canal, you will be cared for by an experienced endodontist, right here in our Brentwood office. Whether you need root canal therapy or re-treatment, we've got you covered.

Restorative Dentistry

If you have ever had a crown or "cap" placed to restore a damaged tooth, you likely had to make multiple visits to your dentist for impressions to be made, placement of a temporary crown and placement of the final restoration after adjustments.

Thanks to CEREC technology, we can now create a precision-crafted crown restoration in just one visit. Single visit crowns are natural looking, tooth-colored restorations that fit and function perfectly.

Implants

For patients who have lost some or all of their teeth, dental implants offer a permanent, more natural-feeling solution than dentures or partial dentures.

Implants don't have to be removed at night and feel much more like your natural teeth as far as bite and chewing function. And you can brush and floss them just as you do your natural teeth.

Periodontics

Your gum health is critical if you want to avoid tooth loss and reduce your risk of cardiovascular disease, heart attack, stroke, diabetes, Alzheimer's and other serious health problems.

Recent studies have confirmed the link between periodontal disease and overall health and identified risk factors. Thanks to laser gum treatment with Waterlase[®], even routine preventive periodontal care is now more comfortable than ever.

Homeless Not Toothless

Founded by Dr. Jay Grossman In 1992, Homeless Not Toothless has provided more than \$5 million in services to over 60,000 homeless Veterans, foster children, and the underserved.

The dentists and staff who work with the patients do so without financial compensation and with only the kindest and more generous hearts.

They all have one thing in common: a belief in the power of a great smile and a commitment to giving homeless people a reason and a way to lift themselves up to a better life.

Meet Our Team

Adjunct Professor, Cardiology & Comprehensive Care — NYU College Of Dentistry
Lieutenant, United States Navy — Long Beach, CA
General Dentistry, Endodontics, Emergency Medicine/Triage
Preceptor, UCLA College of Dentistry
NYU Strusser Award for Outstanding Contributions in Improving Public Health

"Thank you so much for your remarkable service to those in need. In April of 2008, your office treated over 40 homeless children, performing 300 dental procedures valued at \$60,000! Your kindness is a thing of grace and elegance. I was so moved by the diligent efforts and the remarkable sweetness that everyone put forth to strangers. This tells me that in fact, there are no strangers in the world; here or abroad and that we must keep that knowledge close in our minds and hearts."
